M. Pharm

2023-24

CHAPTER –I:REGULATIONS

1. Short Title and Commencement

These regulations shall be called as “The Revised Regulations for the Master of Pharmacy (M. Pharm.)Degree Program - Credit Based Semester System (CBSS) of the Pharmacy Council of India, New Delhi”. They shall come into effect from the Academic Year 2016-17. The regulations framed are subject to modifications from time to time by the authorities of the university.

2. Minimum qualification for admission

A Pass in the following examinations

a) B. Pharm Degree examination of an Indian university established by law in India from an institution approved by Pharmacy Council of India and has scored not less than 55 % of the maximum marks (aggregate of 4 years of B.Pharm.)

b) Every student, selected for admission to post graduate pharmacy program in any PCI approved institution should have obtained registration with the State Pharmacy Council or should obtain the same within one month from the date of his/her admission, failing which the admission of the candidate shall be cancelled.

Note: It is mandatory to submit a migration certificate obtained from the respective university where the candidate had passed his/her qualifying degree (B.Pharm.)

3. Duration of the program

The program of study for M.Pharm. shall extend over a period of four semesters (two academic years). The curricula and syllabi for the program shall be prescribed from time to time by Pharmacy Council of India, New Delhi.

4. Medium of instruction and examinations

Medium of instruction and examination shall be in English.

5. Working days in each semester

Each semester shall consist of not less than 100 working days. The odd semesters shall be conducted from the month of June/July to November/December and the even semesters shall be conducted from the month of December/January to May/June in every calendar year.

6. Attendance and progress

A candidate is required to put in at least 80% attendance in individual courses considering theory and practical separately. The candidate shall complete the prescribed course satisfactorily to be eligible to appear for the respective examinations.

7. Program/Course credit structure

As per the philosophy of Credit Based Semester System, certain quantum of academic work viz. theory classes, practical classes, seminars, assignments, etc. are measured in terms of credits. On satisfactory completion of the courses, a candidate earns credits. The amount of credit associated with a course is dependent upon the number of hours of instruction per week in that course. Similarly the credit associated with any of the other academic, co/extra-curricular activities is dependent upon the quantum of work expected to be put in for each of these activities per week/per activity.

7.1. Credit assignment

7.1.1. Theory and Laboratory courses

Courses are broadly classified as Theory and Practical. Theory courses consist of lecture (L) and Practical (P) courses consist of hours spent in the laboratory. Credits (C) for a course is dependent on the number of hours of instruction per week in that course, and is obtained by using a multiplier of one (1) for lecture and a multiplier of half (1/2) for practical (laboratory) hours. Thus, for example, a theory course having four lectures per week throughout the semester carries a credit of 4. Similarly, a practical having four laboratory hours per week throughout semester carries a credit of 2.

The contact hours of seminars, assignments and research work shall be treated as that of practical courses for the purpose of calculating credits. i.e., the contact hours shall be multiplied by 1/2. Similarly, the contact hours of journal club, research work presentations and discussions with the supervisor shall be considered as theory course and multiplied by 1.

7.2. Minimum credit requirements

The minimum credit points required for the award of M. Pharm. degree is 95. However based on the credit points earned by the students under the head of co-curricular activities, a student shall earn a maximum of 100 credit points. These credits are divided into Theory courses, Practical, Seminars, Assignments, Research work, Discussions with the supervisor, Journal club and Co-Curricular activities over the duration of four semesters. The credits

are distributed semester-wise as shown in Table 14. Courses generally progress in sequence, building competencies and their positioning indicates certain academic maturity on the part of the learners. Learners are expected to follow the semester-wise schedule of courses given in the syllabus.

8. Academic work

A regular record of attendance both in Theory, Practical, Seminar, Assignment, Journal club, Discussion with the supervisor, Research work presentation and Dissertation shall be maintained by the department / teaching staff of respective courses.

9. Course of study

The specializations in M.Pharm program is given in Table 1.

11.2.1. Sessional Exams

Two sessional exams shall be conducted for each theory / practical course as per the schedule fixed by the college(s). The scheme of question paper for theory and practical sessional examinations is given in the table. The average marks of two sessional exams shall be computed for internal assessment as per the requirements given in tables.

12. Promotion and award of grades

A student shall be declared PASS and eligible for getting grade in a course of M.Pharm. programme if he/she secures at least 50% marks in that particular course including internal assessment.

13. Carry forward of marks

In case a student fails to secure the minimum 50% in any Theory or Practical course as specified in 12, then he/she shall reappear for the end semester examination of that course. However his/her marks of the Internal Assessment shall be carried over and he/she shall be entitled for grade obtained by him/her on passing.

14. Improvement of internal assessment

A student shall have the opportunity to improve his/her performance only once in the sessional exam component of the internal assessment. The re-conduct of the sessional exam shall be completed before the commencement of next end semester theory examinations.

15. Reexamination of end semester examinations

Reexamination of end semester examination shall be conducted as per the schedule given in table 29. The exact dates of examinations shall be notified from time to time.

Table – 29: Tentative schedule of end semester examinations

Semester	For Regular Candidates	For Failed Candidates
I and III	November / December	May / June
II and IV	May / June	November / December

16. Allowed to keep terms (ATKT):

No student shall be admitted to any examination unless he/she fulfills the norms given in 6. ATKT rules are applicable as follows:

A student shall be eligible to carry forward all the courses of I and II semesters till the III semester examinations. However, he/she shall not be eligible to attend the courses of IV semester until all the courses of I, II and III semesters are successfully completed.

A student shall be eligible to get his/her CGPA upon successful completion of the courses of I to IV semesters within the stipulated time period as per the norms.

Note: Grade AB should be considered as failed and treated as one head for deciding ATKT. Such rules are also applicable for those students who fail to register for examination(s) of any course in any semester.

17. Grading of performances

17.1. Letter grades and grade points allocations:

Based on the performances, each student shall be awarded a final letter grade at the end of the semester for each course. The letter grades and their corresponding grade points are given in Table – 30.

Table – 30: Letter grades and grade points equivalent to Percentage of marks and performances

Percentage of Marks Obtained	Letter Grade	Grade Point	Performance
90.00 – 100	O	10	Outstanding
80.00 – 89.99	A	9	Excellent
70.00 – 79.99	B	8	Good
60.00 – 69.99	C	7	Fair
50.00 – 59.99	D	6	Average
Less than 50	F	0	Fail
Absent	AB	0	Fail

A learner who remains absent for any end semester examination shall be assigned a letter grade of AB and a corresponding grade point of zero. He/she should reappear for the said evaluation/examination in due course.

18. The Semester grade point average (SGPA)

The performance of a student in a semester is indicated by a number called 'Semester Grade Point Average' (SGPA). The SGPA is the weighted average of the grade points obtained in all the courses by the student during the semester. For example, if a student takes five courses (Theory/Practical) in a semester with credits C₁, C₂, C₃ and C₄ and the student's grade points in these courses are G₁, G₂, G₃ and G₄, respectively, and then students' SGPA is equal to:

$$\text{SGPA} = \frac{C_1G_1 + C_2G_2 + C_3G_3 + C_4G_4}{C_1 + C_2 + C_3 + C_4}$$

The SGPA is calculated to two decimal points. It should be noted that, the SGPA for any semester shall take into consideration the F and ABS grade awarded in that semester. For example if a learner has a F or ABS grade in course 4, the SGPA shall then be computed as:

$$\text{SGPA} = \frac{C_1G_1 + C_2G_2 + C_3G_3 + C_4^* \text{ZERO}}{C_1 + C_2 + C_3 + C_4}$$

19. Cumulative Grade Point Average (CGPA)

The CGPA is calculated with the SGPA of all the IV semesters to two decimal points and is indicated in final grade report card/final transcript showing the grades of all IV semesters and their courses. The CGPA shall reflect the failed status in case of F grade(s), till the course(s) is/are passed. When the course(s) is/are passed by obtaining a pass grade on subsequent examination(s) the CGPA

shall only reflect the new grade and not the fail grades earned earlier. The CGPA is calculated as:

$$\text{CGPA} = \frac{C_1S_1 + C_2S_2 + C_3S_3 + C_4S_4}{C_1 + C_2 + C_3 + C_4}$$

where C_1, C_2, C_3, \dots is the total number of credits for semester I, II, III, ... and S_1, S_2, S_3, \dots is the SGPA of semester I, II, III,

20. Declaration of class

The class shall be awarded on the basis of CGPA as follows:

First Class with Distinction	= CGPA of 7.50 and above
First Class	= CGPA of 6.00 to 7.49
Second Class	= CGPA of 5.00 to 5.99

21. Project work

All the students shall undertake a project under the supervision of a teacher in Semester III to IV and submit a report. 4 copies of the project report shall be submitted (typed & bound copy not less than 75 pages).

The internal and external examiner appointed by the University shall evaluate the project at the time of the Practical examinations of other semester(s). The projects shall be evaluated as per the criteria given below.

Evaluation of Dissertation Book:

Objective(s) of the work done	50 Marks

Moreover, the candidates should have completed the M. Pharm program in minimum prescribed number of years, (two years) for the award of Ranks.

23. Award of degree

Candidates who fulfill the requirements mentioned above shall be eligible for award of degree during the ensuing convocation.

24. Duration for completion of the program of study

The duration for the completion of the program shall be fixed as double the actual duration of the program and the students have to pass within the said period, otherwise they have to get fresh Registration.

25. Revaluation I Retotaling of answer papers

There is no provision for revaluation of the answer papers in any examination. However, the candidates can apply for retotaling by paying prescribed fee.

Assignment No: 1.

Que 1. Explain in detail biosynthesis, storage and Release of Nor-epinephrine.

→ Biosynthesis of Norepinephrine.

The biosynthesis takes place in adrenergic and dopaminergic neurons in the CNS in sympathetic neurons in the ANS and in adrenal medulla.

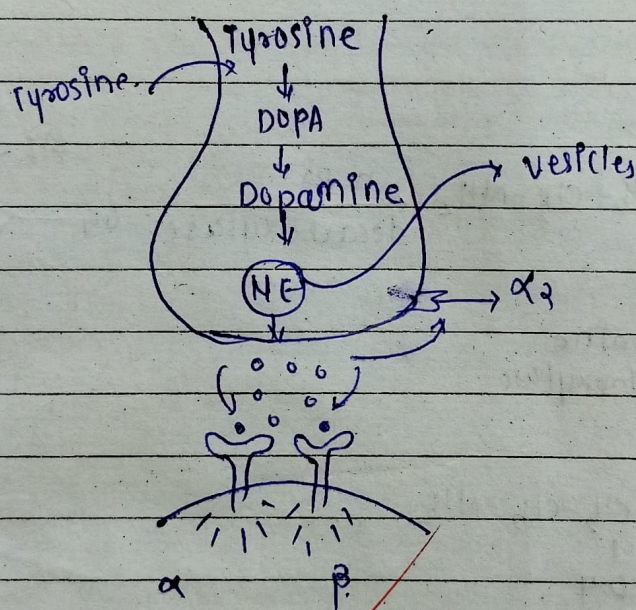

- phenylalanine get hydrolysed into tyrosine in liver.
- Tyrosine get hydrolysed into DOPA by enzyme tyrosine hydroxylase (cytoplasm)
- DOPA convert into Dopamine with the help of enzyme DOPA decarboxylase in which CO_2 removed.
- Dopamine is converted into non-adrenaline with the help of enzyme dopamine β -hydroxylase.

- Nor adrenaline get converted into adrenaline with the help of enzyme phenylethanolamine - N-methyl transferase (PNMT)

Release of Neurotransmitter (Noradrenaline)

- The noradrenaline formed in the nerve remains stored in vesicles in the form of ATP complex.
- Now, Nor-adrenaline diffuse out in cytoplasm and get methylated into adrenaline.

= Adrenaline then enters into chromaffin granules and get stored.

- Now adn Neurotransmitter release from vesicles.
- then neurotransmitter bind with receptors and give action / response.

Mechanism of action.

- potent at α receptor.
- (Less potent than adrenaline.)

-also affect on β -Receptor but no effect on β_2 Receptor

Uses:

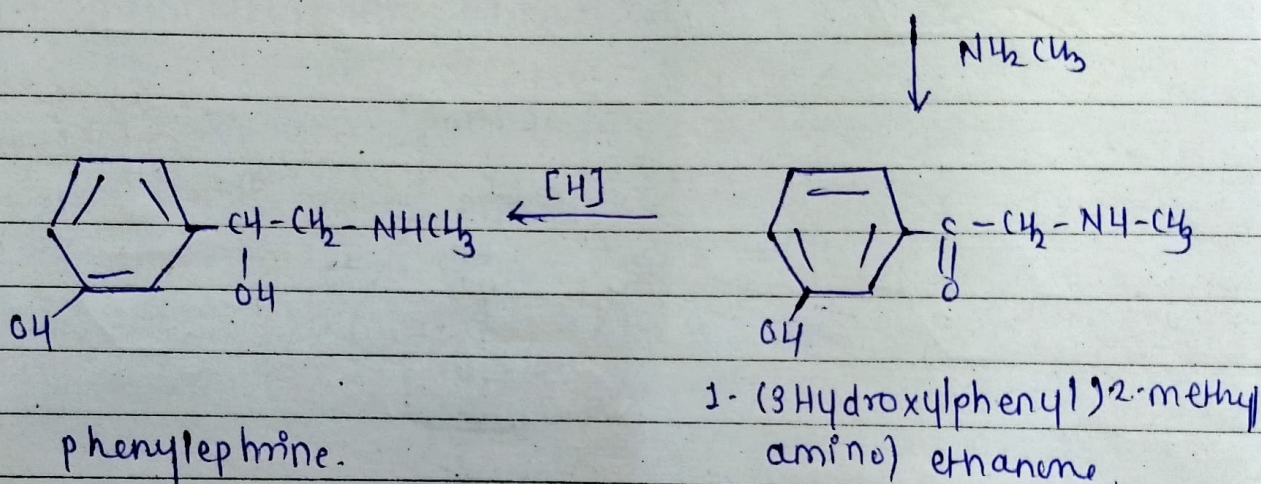

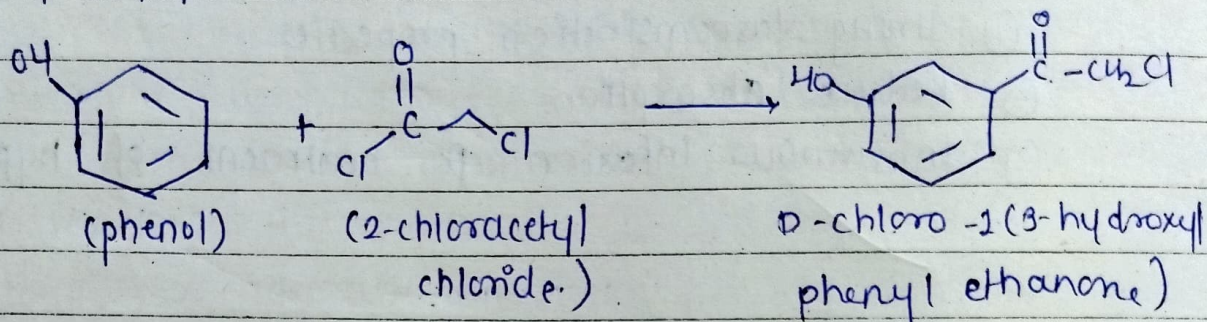

- ① strong vasoconstriction properties
- ② Reduce absorption
- ③ Intravenous infusion for treatment of hypertension

- ② \uparrow Blood pressure in acute hypotension.
- ③ used as mydriatic agent during eye surgery.

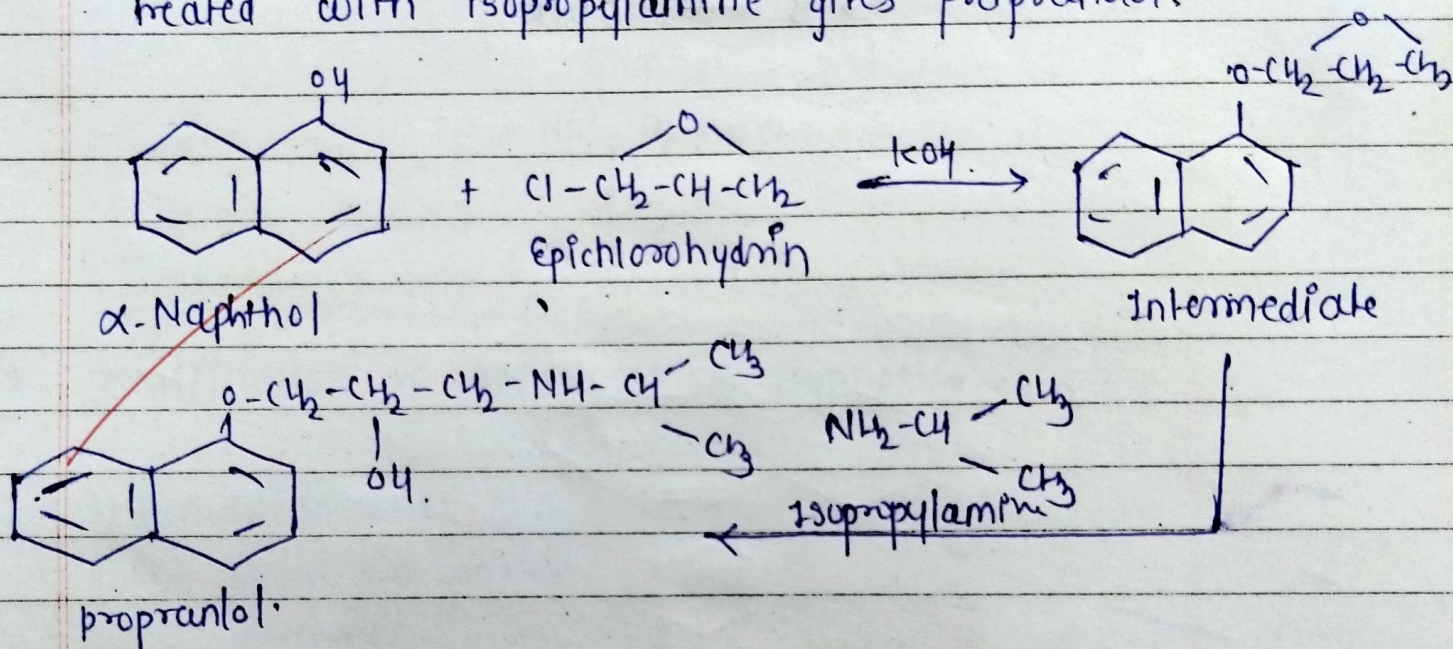

II

Propranolol:

- 1) It is white powder.
- 2) Non-selective β -blocker.

Synthesis:

When α -Naphthol is treated with epichlorohydrin in presence of base, the intermediate formed is then treated with isopropylamine gives propranolol.

Q2

Elaborate on SAR of Benzodiazepine and Barbiturate

Ans.

The basic structure of Benzodiazepines.

Structurally substitution is responsible on :-

Ⓐ Aryl group:

Ring (B) = 1,4-diazepine ring.

Ring (C) = phenyl substitution.

Ring Ⓐ :- In ring A at 7th position of an electron withdrawing group like

-Cl, -Br, -NO₂ or CN will increase the activity.

E.g. flurazepam.

- we add any substitution at position 6th, 8th, 9th in ring Ⓐ the activity decreases.

- Ring B: In Ring B substitution of alkyl group like CH_3 or C_2H_5 at position 1st on nitrogen will increase activity.

E.g. flusazepam.

- carbonyl group ($-\overset{\text{O}}{\parallel}{\text{C}}-$) present at position IInd is essential and good for activity. Replacement of this carbonyl function with two hydrogen atom gives medazepam, which is less effective (activity ↓).

- By replacing one of the hydrogen with OH group at position IIIrd lowers the activity and facilitates elimination.

- Attachment of carbonyl group at position IIIrd increases duration of action and forms water soluble salts.

- At position IVth and Vth double bond is good for activity. Saturation of this reduces potency.

Ring C.

- phenyl substitution at position VIth increases activity.

- Attachment of an electronegative substitution like Cl^- and F^- at ortho and diortho position will increase the activity.

By replacing this benzene ring with aromatic Heterocyclic ring (Eg. pyrazole) increases anxiolytic properties.
eg. pipazepam etc.

2] Barbiturates.

- the main drug in barbiturates is barbituric acid → 2,4,6-trioxohexahydropyrimidine

- It has less CNS depressant but substitution at various position give many compound with sedative and hypnotics activity

SAR of Barbiturates

- substitution has been done at 1st and 5th position.
- At 5th position:
Replacement of 'H' atom by alkyl group at 5th position increases the ability of drug of cross BBB and activity increases.
eg: phenobarbitone

- Now further increases in the branching of this alkyl chain at position 5th increases lipophilicity
eg: phenobarbitone.

- Higher the branching greater will be its potency but more than 8-9 branching CNS depressant action decreases.

- At 1st position:-

- substitution of $-CH_3$ group of position 1st activity but decreases duration of action.

Eg. methylphenobarbitone

- at position 1st and 3rd on Nitrogen, Replacement of H atom by alkyl group at only one 'N'

increases activity increases but replacement of 'H' at both 1st and 3rd position decreases activity decrease.
