

INNOVATIONS & INCUBATION

College has constituted R & D cell, Start-up and Innovation Cell (in collaboration with Innovation, Incubation and Linkages Cell SPPU) and Industry-Institute Partnership cell for enhancing research activities.

INNOVATION AND START-UP CELL:

The college has constituted Innovation and Start-up Cell as per the norms of Centre for Innovation, Incubation and Linkages at Savitribai Phule Pune University, Pune for enhancing research activities. Under Innovation and Start up cell, students are motivated for entrepreneurship. Identification of problem and idea creation for business models are initiated through cell by conducting visits to Industry, NGO and organizing Idea creation competition.

Aims and objectives of Innovation and Start-up Cell:

- ✓ To inculcate the spirit of entrepreneurship among faculty and students.
- ✓ To establish links with various R&D organizations and funding agencies for the project ideas of students and faculty.
- ✓ To explore and identify the opportunities of interaction with industry.
- ✓ To motivate Students and faculty to start their own ventures as start-ups.

Details: IQAC cell and Innovation and Startup Cell of PRES's, College of Pharmacy (For Women), Chincholi, Nashik organized e-Workshop on "INNOVATIVE EDUCATION AND EDUCATING INNOVATION" in association with Design Innovation Center (DIC), Spoke of Savitribai Phule Pune University, A Scheme of MHRD, New Delhi, PVP College, Pravaranagar. Expert session began with talk of Prof. Rishikesh H. Autade who focused about how Innovation is important in entrepreneurship. He explained to the students that Innovation doesn't always mean to create something new, innovators often take something that already exists, improve it, change it, make it better and make it the best for their customers. Innovative ideas are what will make a startup competitive. He also focused on how innovation is a facilitator of entrepreneurship and a way of empowering people to take

charge of their lives and economic prosperity. The vote of thanks was given by Dr. Ramdas T. Dolas, Chairman of IQAC cell and Innovation and Startup Cell of college. Total 163 participants were present for the e-workshop. The workshop was coordinated by Dr. Sachin B. Somwanshi & Mrs. S. N. Bhandare.

(57) Abstract

ABSTRACT Our Invention Formulation and Evaluation of polyherbal handwash with potential antibacterial activity is a he points of present work was to get ready definitions of polyherbal handwash, hand wash was ready and the details were assessed for actual properties like appearance, pH and consistency. The antimicrobial action of arranged definitions of hand wash was checked against skin microorganisms Bacilus subtilus, Staphylococcus aureus, Psuedomonas aeruginosa and Escherichia coli by agar dispersion strategy. The outcomes uncovered that pre-arranged home grown hand wash definitions showed critical zone of restraint contrasted and standard anti-microbial medication (Amoxicillin). So these plant materials can be utilized in the planning of natural hand wash on economically scale. Natural medications are huge piece of medical services all through the world. Home grown drugs have been broadly used as viable solutions for the counteraction and the executives of various ailments. Hands are a superb method of transmission of organisms and nosocomial contaminations. Hand-washing is amazingly basic in medical care and homegrown area. Various of the sterile hand wash accessible in the market are liquor based sanitizers which have some antagonistic impacts.

(57) Abstract

ABSTRACT Our Invention Control the Fever using Composition of (Honey, Ginger, Basil, etc.) is a Phototherapy, or herbalism, is characterized as the utilization of plants or spices as drug to treat or forestall sicknesses in human and creatures. In this part, the antiviral impacts of a few spices and their concentrates against infections as far as the system of activity in focusing on viral replication steps, the impacts in the host and the application in creatures will be talked about. The data given might support working on the wellbeing and increment the creation of creatures. Torment is an emotional, multidimensional and undesirable experience aligned with real or potential tissue harm containing tangible, full of feeling and intellectual parts. Torment signals understanding is a perplexing interaction that involves excitation of fringe nerves and further excitation of nociceptive sources of info. Painkiller is individual from assorted gathering of medications used to diminish torment and to accomplish absence of pain. Fever is perceived as physiological reaction which is set off by irresistible boosts or aseptic upgrades. Rise in internal heat level happen when groupings of prostaglandin-E2 (PGE2) increments inside specific spaces of the cerebrum. A few customary restorative frameworks are accessible for the treatment of torment and fever like ayurveda, unani, Chinese, homeopathic, physiotherapy and non-pharmacological methods and so on Agony and fever treatment in allopathic framework are often utilized however has numerous unfriendly impacts like renal and liver brokenness, ulceration, sedation, dazedness, queasiness, heaving, stoppage, actual reliance, resilience and respiratory discouragement and so forth This gathering tends to the diverse therapeutic frameworks and treatments utilized for the treatment of agony and fever.

Company Profile

Sahyadri Farms is a group of farmers that grow fruits & vegetables on less than 1 Hectare of land for you. Sahyadri Farms is smaller than the smallest farmers and hence are called the 'Marginal Farmers' of India. Many such like us across India together account for 63% of the total farmer population.

Sahyadri Farms is a collective group of farmers aka 'Farmer-Producer Company (FPC)' here's a little recap from where Sahyadri Farms started:

Year 2000: Faced many challenges

Year 2003-04:

Alone, Sahyadri Farms could do so little and so 10 of them got together to overcome the challenges Sahyadri Farms faced and hopefully change this situation for our farming fraternity someday.

2003 is the year when Sahyadri Farms became 'farmers-entrepreneurs' from just marginal farmers. Sahyadri Farms started setting up the necessary infrastructure for the next lyear which included a privately held company, APEDA approved infrastructure which would be capable to export our produce.

In 2004 Sahyadri Farms got their first direct order and Sahyadri Farms shipped 4 containers of fresh grapes to the European market.

Year 2006-10:

In these 4 years Sahyadri Farms grew in strength - a greater number of farmers joined us and Sahyadri Farms were 140+ marginal farmers now working together to bring the change.

Sahyadri Farms were now shipping our produce across the globe to leading super-markets grossing 150 containers of fresh grapes alone.

Year 2011-13:

2011 is the milestone year for us - Sahyadri Farms branded themselves "Sahyadri Farms" - a Farmer Producer Company (FPC) - by the farmers, of the farmers and for the farmers...! Sahyadri Farms graduated from 'farmer-entrepreneurs' to a full-fledged 'farmer company' now and overcame most of our challenges.

Sahyadri Farms setup their own infrastructure, agro advisory team, a world class pack-house, cold storage facility and minimized post-harvest losses. Our group of farmers jumped almost 4 times from 2010 and touched 550 by 2013.

Year 2014:

Sahyadri Farms were now a 'Fort Knox' as Sahyadri Farms crossing 1007 marginal farmers as part of our group and this year Sahyadri Farms become India's leading exporters of fresh grapes.

Sahyadri Farms shipped 625 containers of great tasting fresh grapes that is 9000MT valued at US\$ 17 million.

This is what the progression looks like from 2004 to 2014:

CHAIRMAN

Mr. Vilas Shinde, Chairman, Sahyadri Farms (B. Tech agree, Rahuri Krishi Vidyapeeth)

The seeding of "SFPCL-Sahyadri farms" happened in Nashik in 2011 with the simple intention of ensuring a fair return to the farmers and with the quality produces reaching to the end users. Sahyadri was a movement, to uplift the farmers and to get them their righteous due. Organizations talk about CSR as one of their activities but we at Sahyadri converted the entire organization as CSR and it became a movement!!!

The idea behind the entire movement was to buy all the F&V produce offered by them under the food safety standards. The primary objective was to provide the best of infrastructure and

Page 3 of 9

VALI

adequate production and processing facilities to the farmers who could not secure a g_{Ood} produce due to frugality of resource and operations.

The movement was to develop first of its kinds branded traceable product-mix that would promote sustained growth and that we could cater with the best to the Indian Consumers too, by offering them quality products at fair prices, and to do so by achieving economies of scale and costs. This movement was driven on Farmer producer model that would play an ever-increasing role in the rural economy, providing gainful employment to large numbers of farmers and allied.

A structure, owned by farmers that would, with time, be the farmers "best friend" ... And the intention was that the highest levels of consumer confidence would be reposed in the brand called Sahyadri...by 'Seeding Goodness'.

VISION

To be a leading Farmer Producer Company (FPC) with the power to bridge the gap between the rural and urban communities;

- By making farming a profitable & sustainable business for all our farmers and
- By providing safe, healthy, affordable farm produce and value-added products to our consumers

Whilst caring for the environment, empowering our stakeholders and strengthening the economy.

MISSION

Sahyadri Farms is a trusted, value driven and professionally managed Farmer Producer Company (FPC) of the farmers, by the farmers, for the farmers.

- 1. Sahyadri Farms aims to make farming profitable and sustainable by;
 - Assuring the best possible realiza?on for all farm produce under all circumstances,
 - Optimal utilization of available resources, as well as reducing overall costs at the farm level and also throughout the value chain,
 - Effective financial and risk management,
 - Mentoring the farmers to increase quality and productivity as per global standards using enhanced technology,
 - Effective Post Harvest Management.
- 2. Developing a robust supply chain, which promises traceable, safe, healthy, and affordable farm produce and value-added products, from farm to plate.
- 3. Building respectable relationships with the environment, employees and all other stakeholders.

VALUES

- Happiness
- Ethics
- Transparency
- Diversity
- Knowledge driven

Product Portfolio

Following fruit processing takes place at Sahyadri Farms

FRESH FRUITS

ASEPTIC PULPS/PUREES & CONCENTRATES

Aseptic fruit processing is a method by which product is kept sterile and is packed in sterile drums/containers to maintain the sterility. During the process with the flash heating process the sterility is adequately maintained which allows the product to maintain a longer shelf life without any preservatives till the opening of the aseptic bags.

FROZEN FRUIT PULPS/PUREES

Plate freezers are used for freezing fruit pulps/purees like Mango, Guava, Papaya etc. Pulp is made with state of art pulp processing line and then packed in unit packs using FFS machines. The product is loaded into the station in trays, the freezing plates then closed hydraulically, thus ensuring double contact, both on the top and bottom of the product. A rapid, efficient and even freeze is thus achieved using advance designed Plate freezer imported from TempTech Thailand.

IQF (FRUITS & VEGETABLES)

The individual quick frozen (IQF) process perhaps the only method where by all the natural parameters of the Fruits & Vegetables can be preserved. The most important feature of this process is the ultra-rapid freezing to a very low temperature (-30 degree C to -40 Degree C), designed to arrest the activities of micro-organisms that may cause the decay and deterioration of a particular fruit or Vegetable. Such process also gives a much longer shelf life of say 24 months keeping instance of colour, flavour, texture of the product.

At Sahyadri Farmers Producer Co. Ltd, are determined and committed to deliver the Quality, Safe & Traceable Products as per the National and International Standards requirement.

To meet their commitment, they ensure:

- To comply statutory, regulatory and mutually agreed requirements of the customer.
- To procure excellent quality raw material and process & pack it in hygienic conditions with advance technology.
- Controlling the food safety hazards at the supplier level by approving the Supplier and checking the incoming raw and packaging material before use at factory.
- Efficient utilization of all the resources.
- Meeting customer expectations of required standards of the product in time and at a competitive price.
- Effective Internal and External Communication
- To review and communicate our Quality and Food Safety Policy to all levels of organization.
