ENTREPRENEURSHIP CELL:

It helps student community to conduct research work and survey for identifying entrepreneurial opportunities (particularly in Pharma and Service sector).

Functions:

- We invite eminent personalities from small and large industries and organize guest lectures and seminars with them.
- We visit nearby villages and promote entrepreneurial education to the backward students.

Moto of the Department:

Nurture entrepreneurship in those people who have a passion for knowledge generation and mentoring. To create employment opportunities to unemployed youth, increase individual savings which indeed will increase the per capita income, standard of living and thus revenue to the government.

Report on WORKSHOP ENTREPRENEURSHIP DEVELOPMENT 2018-19

University of Pune sanctioned a grant for year 2018-19 under Workshop on Entrepreneurship Development to our college total 04 expert lectures on various topics were organized on various subjects for the girls of B. Pharmacy. Arrangement for the lectures was made in the seminar hall. Total 120 students benefited with this **Workshop on Entrepreneurship Development**. Students of backward class also benefited with the scheme.

Workshop on Entrepreneurship Development really help the students by improving their knowledge of **Entrepreneurship** with various aspects related with them. They are going to achieve their education goals through this knowledge. We really appreciate the efforts taken by the university to organize these events for colleges. The university is routinely taking such efforts for students and releasing the grants for motivating the college to conduct such activity.

We thanks to the Vice chancellor, Director Board of student's welfare and their staff members for helping us. This will also improve the awareness of the college teachers.

Ms. / Mrs. / Mr. Vinayak Madhukar Gaware

Dear Scholar,

It is hereby informed that your registration in this university for doctoral course on a topic 'DESIGN, CHARACTERIZATION AND MICROWAVE ASSISTED SYNTHESIS OF BIOLOGICAL ACTIVE SCAFFOLDS FOR ANTICANCER AND ANTI-DEPRESSANT ACTIVITY' under the guidance of Dr. Rakesh Kumar Jat has been accepted. So your provisional registration number 27817150 is confirmed as permanent registration from the date 28/05/2019. Now, you are expected to strictly adhere to the following:

1. You are expected to read carefully the Ph.D. ordinance of this university (available on website www.jjtu.ac.in)
2. You are expected to participate in national or international seminars (minimum four) and submit participation certificates. Presenting papers in such seminars - one of your topic and the other of general would be ideal.
3. You will have to publish two research articles in an ISSN referred journals and submit original or reprint for our record
4. You will submit summary of the Thesis for appointment of examiners. You will submit the thesis only when soft copy is evaluated by our department and you give a pre-submission seminar. Upon confirmation, you will submit the final thesis duly hard bound.
5. All dues should be paid before the submission of Thesis.
6. See instruction on website or contact to Ph.D. coordinator while coming for submission of Thesis.

Any default on the above shall create inconvenience to you. It is further informed that during verification of documents submitted by you, anything is found false, the admission will stand cancelled automatically.

Validated stability indicating HPTLC methods for the determination of entecavir in bulk and dosage form

ABSTRACT

The objective of the present work is to develop a simple, precise, accurate, validated stability indicating HPTLC method for the determination of Entecavir in bulk and tablet dosage form. The HPTLC method employed TLC aluminium plates precoated with silica gel 60F-254 as the stationary phase. The solvent system consisted of Chloroform:Toluene: methanol: ammonia (7:2:1:0.2v/v) and then scanned. The system was found to give compact spot for Entecavir (R_f value of 0.51 ± 0.02). The linearity was found to be in the concentration range 300-1800 ng/spot. The reliability and analytical performance of the proposed methods, including linearity, range, precision, accuracy, detection and quantitation limits, were statistically validated. When entecavir was subjected to different stress conditions; the proposed methods could effectively separate the drug from its degradation products, and were thus considered as good stability-indicating procedures. It is concluded that this method can be applied for routine quality control of Entecavir in dosage forms as well as in bulk drug.

INTRODUCTION

Entecavir (ETV) is a nucleoside analog [1] with the chemical name 2-Amino-9-[(1S,3R,4S)-4-hydroxy-3-(hydroxymethyl)-2-methylidenecyclopentyl]-6,9-dihydro-3H-purin-6-one(**Fig.1**) [2]. Entecavir is a guanosine nucleoside analogue with selective activity against hepatitis B virus (HBV). It is designed to

selectively inhibit the Hepatitis B virus, blocking all three steps in the replication process [3, 4].

Literature survey revealed, few analytical methods which include UV-spectrophotometric methods [5-7] liquid chromatographic methods [8, 9] have been reported for estimation of ETV. However, to our knowledge, no information related to the stability-indicating UV and high-performance thin-layer chromatography (HPTLC) determination of ETV in

***In-vivo* Evaluation of the Wound Healing Activity of the *Sesamum Indicum* L. Seed Extract in Novel Ethosomal Vesicular System**

ABSTRACT

Aim: To establish the wound healing activity of *Sesamum indicum* L. of seed extract in novel ethosomal vesicles. **Methods:** The ethosomal vesicles were formulated with prepared seed extract of *Sesamum indicum* L. by solvent evaporation method and characterized it. The optimized ethosomal vesicles then incorporated into gel base for further *in vivo* study in wistar rat. The evaluation of the wound healing activity was performed by using two models i.e. incision and excision models. In excision model percentage wound contraction and period of epithelialization were established for both the extracts. In incision model the parameter which was carried out was breaking strength of wounded skin. **Results:** The results revealed that the percentage wound contraction, period of epithelialization in excision model was enhanced than that of other groups and tensile strength of skin in incision model was similar to that of standard treated group.

INTRODUCTION

Wound may be defined as a disruption of the cellular and anatomic continuity of a tissue.¹ Wounds are inescapable events of life and they arise due to physical injury, chemical injury or microbial infections. Healing of wounds usually takes place in a direction away from its normal course and under-healing, over-healing or no healing of wounds is common. Management of under healing of wounds is a complicated and expensive program and research on drugs that increase wound healing is a developing area in modern biomedical sciences.² Wound healing is a process that is characterized by three overlapping phases: inflammation, tissue formation then tissue remodelling. Wound healing studies are mainly aim to detect various means and factor influencing healing process, so they

could be either used or avoid in clinical practice to favourably alter the healing process. Although many indigenous tribes around the world have long suspected that this ubiquitous, annual, herbaceous plant might have medicinal wound healing properties, it has not really got the attention of orthodox medical practitioners as a potential source of a healing agent which may prove to be useful in the treatment of wounds.³

Numerous growth factors, cytokines and intricate network of blood cells are involved to restore the normal condition of injured skin⁴. Chronic wounds affect 5.7 million patients annually causing both physiological and mental trauma⁵⁻⁶. Irrational use of antibiotics, over the counter drugs and environmental pollution are the main culprits for the development of bacterial resistance thereby hindering the process of wound healing. This necessitated the paradigm shift from allopathic medicine
